

PROJECT ACCESS SELF-MANAGEMENT & CW-FIT TRAINING

Springfield, Mo

Join nationally recognized educator and behavior specialist Howard Wills from the University of Kansas for an engaging, hands-on workshop exploring two evidence-based practices that promote student success: Self-Management and Class-Wide Function-Related Intervention Teams (CW-FIT).

Participants will learn to:

- Implement self-management strategies that promote student independence and self-regulation.
- Teach students to monitor, evaluate, and reinforce their own behavior.
- Utilize the CW-FIT model to improve classroom climate and increase academic engagement.
- Reduce disruptive behaviors through proactive, positive behavior supports.
- Develop action plans for successful implementation in classrooms and school settings.

This interactive workshop is ideal for teachers, special educators, administrators, behavior specialists, school psychologists, and related service providers seeking practical tools to enhance student outcomes and create supportive learning environments.

Dr. Howard Wills
Trainer Bio

Dr. Howard Wills is a Professor in the Educational Psychology Department at the University of Kansas (KU) and Senior Scientist at Juniper Gardens Children's Project (JGCP/KU). He received his doctoral training and an M.B.A. at KU. His current research interests include evidence-based academic and behavioral interventions for students. He has extensive experience developing and evaluating multi-tiered systems of support, classroom engagement interventions, and technology based self-monitoring to support children and adults with disabilities. Over 25 years at JGCP, Dr. Wills has been fortunate to have been Principal or Co-Principal Investigator for over \$79 million in competitive grants. This work has been carried out with colleagues across the country and has been widely published.
