PROJECT ACCESS

Peer Mediated Instruction

Peer-Mediated Instruction (PMI) is an evidence-based intervention in which trained peers support and model appropriate social, communication, and learning skills for individuals with autism, promoting meaningful interactions, inclusion, and skill development in natural settings.

Free

Independence, Mo

Objectives:

- Improves social interaction and relationship-building skills.
- Increases communication and conversational skills.
- Enhances social responsiveness and understanding of social cues.
- Promotes inclusion and participation in classroom and community settings.
- Provides opportunities to learn through peer modeling and natural interactions.
- Increases engagement in academic and group activities.
- Encourages independence and self-confidence in social situations.
- Supports the development of positive peer relationships and friendships.
- Reduces social isolation and increases opportunities for meaningful social experiences.
- May decrease challenging behaviors by increasing appropriate social engagement.
