

NERPDC LOCAL WORKSHOP

WITH PROJECT ACCESS

WHAT?

BEHAVIOR+ ENVIRONMENTS MAKE AND TAKE

Join us for a deep dive into the fundamentals of behavior, equipping educators with the tools to swiftly identify behavior functions and implement evidence-based practices for student success. This training explores various behavior modification techniques, from modifying antecedents to teaching replacement behaviors and adjusting consequences. Additionally, we'll discuss the power of self-advocacy as a strategy to reduce challenging behaviors. Whether you're a seasoned educator or new to the field, this workshop offers practical insights to enhance classroom management and promote positive outcomes for learners. Our Environment course is designed for educators, administrators, and support staff who aim to create inclusive classroom environments that effectively support students. Participants will explore evidence-based strategies, best practices, and practical tools for fostering an educational setting that accommodates diverse learning needs and promotes positive behavior.
